

# Rasmus Kristensen, 26

## Global Business Engineer (ICT)

### Profile text

I know how to be present in my work and at the same time have a solid overview of my surroundings as well as always receptive to new inputs. My personality is very energetic, and I have a high degree of diligence. Both on own projects, but also in teams. My knowledge of C# and .NET coding has been the foundation of my programming career, and I have loved working with APIs. At the time of writing, I am in the process of creating my own website with HTML, CSS & Javascript. It has really made me think more creatively about the many possibilities there are.

### Work experiences

#### Software Developer (Intern) - **Netcompany A/S, Aarhus**

02/2022 - 06/2022

With the acquisition of the Greek Intrasoft International S.A, the C25 company Netcompany is responsible for the employment of over 7,000 employees worldwide, of which the vast majority are within software. As an intern employed in the consulting company's APS department, and during my time was included in two different software teams:

##### Team L

- Advanced C# maintenance and further development for the customer *Your Public Transport* (DOT).
- Building LINQ syntaxes for database extraction in the code.
- Creative optimization of the Legacy code base.
- Complex SQL extracts on the production environment with important information for the customer.

##### Team I

- Basic understanding of SharePoint solutions and extended knowledge of improving existing setup.
- Customer understanding and organization and time assessment of own tasks.
- Configuration of local hosted server and Digital Post.
- Creation of TypeScript hotfix code for changes in SharePoint solutions.

#### IT-supporter (Student Worker) – **HMF Group, Højbjerg**

08/2021 - 12/2021

- Finding and solving hardware and software errors and handling technical machine problems.
- Installation and configuration of new computers.
- Program and set up new users in Active Directory systems.
- Insight into good communication and conveying constructive messages.

### Global Business Engineering - Bachelor Project 2023

The bachelor project resulted in a Teams plugin application in collaboration with Systematic Aarhus. Together we have tested, discussed, and prepared an application which purpose was to create better a better social environment among the employees. The project has heightened the experiences within:

- Entity Framework Core
- Azure SQL server
- LINQ
- REST API

## Hobby projects

---

### *React.JS*

In my spare time I have tried my hand at making React.JS projects. Through video material and other documentation, I have managed to create a website, which has given me a greater insight into React and its setup.

### *Website*

I have started to create a website around my CV/a-bit-about-me in HTML, CSS, and JavaScript. The goal is for it to be responsive and have a minimalist look that briefly describes my qualifications and competences.

## Academic background

---

2023 - Global Business Engineer w. ICT specialty- **VIA University College**

2018 – Enlistment - **Holstebro Barracks**
